## ELECTRIC DOUBLE SCISSOR LIFT TABLE

ETFD35 is an electric lift table with double scissor lift action and 350kg capacity.

The double scissor action allows a greater maximum height, in this instance a maximum of 1.3m

The truck is produced in a heavy duty power coated construction and comes supplied with a heavy duty sealed maintenance free battery. An integral mains battery charger is also included.

Vertical movement is from a control box fitted to the handle and there is an emergency stop button fitted. A further safety feature of this double scissor lift electric truck is the inclusion of 2 lockable swivel wheels.

A mobile double scissor lift table can be used for a host of applications, such as assisting feed on a production line or changing computer servers
