1.4m 800kg Double Scissor Lift Table

TAD80 is a double scissor lift table, with a maximum 1.4 metre lift height and a 800kg lift capacity.

Foot operation raises the table to your desired height, and lowering is controlled with a hand operated trigger.

Used for example for assembly lines and moving servers, scissor lift tables have many uses across industry.

The minimum height of the scissor lift table is 490mm and the table size has a platform size of 1010x520mm.

Made from high strength steel and featuring nylon guide wheels, which help the table go up and down smoothly.

It has twin wheel locking brakes and an explosion proof valve for smooth decline in an emergency.

Conforms to EN1570:1988+A2
