LOAD ROLLER SIZE DxW	75x50mm

EX10 Electric High Lift Pallet Truck

The EX10 is a semi-electric high lift pallet truck, with a capacity of 1000kg.

For piece work and on production lines, high lift pallet trucks can save time, money and reduce injury caused by repetitive strains and lifting, when loading and unloading pallets.

The electric high lift pallet truck saves time, minimises effort and can be placed closed to a staff members workstation, at a height upto 800mm.

Lateral stabilizers auto lock once the forks are raised above 400mm, to prevent the high pallet truck from moving.

Due to the scissor action, this unit is designed for an open pallet only footprint. The across fork dimensions are 540mm x 1150mm. Please check your pallet first for compatability and ensure that your loads are balanced and suitable.

Rechargeable Battery and Charger pack are included.

We provide a nationwide 2-3 day delivery service with next day delivery available on request.
All of our products come with a twelve limited month warranty
