Stainless Steel Hand Pallet Truck ACS20A

Stainless steel pallet trucks are widely used for carry pallet containing meat, sea products, dairy products, wines, beverages, chemicals etc. and are ideal for working in low temperature conditions, such as taking goods in and out of cold storage.

The ACS20A has a 2000kg capacity and fork dimensions of 540x1150mm, which are suitable for handling most sizes of pallets. It features a high quality stainless steel hydraulic pump, which requires very little maintenance.

Supplied as standard with Nylon Wheels, which are known to be better for damp or harsh applications.
