All of our products come with a twelve limited month warranty

63" FORKLIFT FORK EXTENSIONS

Forklift Fork Extensions provide a cost effective and simple method, to handle the occasional long or awkward loads.

Easily fitted and removed, a fork extension can add upto a maximum of upto 50% extra length, to the existing forks.

Working out the Safe Working Load (SWL)

Take the SWL at load centre from the forklift truck.
(Normally on the truck or provided by truck manufacturer)

Example - Fork Length 48", SWL 2500kg at 24"
Fork Extensions - 72" - so load centre moves to 36"
 $24 / 36$ multiplied by 2500kg = 1667kg SWL

Note: A fork extension designed for a 6" (150mm) fork is manufactured with clearance to allow for manufacturing tolerances of both the fork extensions and the forklift forks. ie. Internally it may be 6.5" (165mm) wide.
