## EX10B Wide Electric High Lift Pallet Truck

The EX10B is a semi-electric high lift pallet truck, with a capacity of 1000kg and wider than standard across the forks dimensions, better suited for larger pallets.

For piece work and on production lines, high lift pallet trucks can save time, money and reduce injury caused by repetitive strains and lifting, when loading and unloading pallets.

The electric high lift pallet truck saves time, minimises effort and can be placed closed to a staff members workstation, at a height upto 800mm.

Lateral stabilizers auto lock once the forks are raised above 400mm, to prevent the high pallet truck from moving.

Due to the scissor action, this unit is designed for an open pallet only footprint. The across fork dimensions are 680mm x 1170mm. We recommend you check your pallet dimensions first, for compatability and also ensure that your loads are balanced and suitable.

Rechargeable Battery and Mains Charger pack included.
