

HLTN10 Scissor Lift Pallet Truck

The HLTN10 is a single stage cylinder scissor lift pallet truck with a 1000kg capacity.

Due to the scissor action of the forks, High lift pallet trucks are designed to be open bottomed pallets and stilages only.

Maximum lift height on this unit is 800mm, with across fork dimensions of 540x1170mm. With independent fork sizes of 160x50mm section.

High Lift Pallet Trucks are particularly useful when loading and unloading pallets, such operations commonly undertaken by piece workers on a production line. High lift trucks used in this fashion can greatly reduce back related injuries and strain.
