Net Weight	95kg

SAC-W-568x1150 Weigh Scale Pallet Truck

A Weigh Scale Pallet Truck is a useful and valuable asset to aid efficiency in a warehouse.

A weighing scale truck can be taken to the load, which reduces the number of operations required.

With 2000kg capacity and 1kg steps/increments, these units are more accurate than a normal check weighing pallet truck.

The unit features an automatic tare facility, a large LCD display and is powered by a mains rechargeable battery. (Charger included).

Weighs both in Pounds, or Kilos.

Supplied with double PU Rollers front and rear.
