Load Rollers (PU):	80x70mm
Size of Forks:	160x50mm
Overall width over Forks:	540mm
Fork Length:	1150mm
Weigh Scale Capacity	3000kg
Net Weight:	85kg

HEAVY DUTY

3000kg High Capacity Hand Pallet Truck

If you want a hand pallet truck with a higher than standard capacity, then the AC30A maybe ideal for you.

With a higher capacity of 3000kg, this unit is capable of lifting those extra heavy loads.

The dimension across the forks is 540x1150mm, which is the ideal size for the most common of the Euro Pallets (120x80cm), but still big enough to lift the standard pallets of 120x80cm.

Key features of note are equipped with oil-free self-lubricating bearings and injection nozzles, which will reduce operating power, reduce noise and prolong the truck's life.

Supplied as standard with quiet operation tandem PU rollers.

Intergral type pump body contains the hydraulic circuit and hydraulic oil tank, ensuring the hydraulic system is completely sealed. Each hydraulic unit is load static pressure tested after assembly at the factory, to check for leaks and ensure long life.

Colours can vary - please contact us first if this is a problem
