

X24 + Y24 - 48 TONNE LOAD MOVING SKATE SET

This 48 tonne Machinery Roller Skate set is ideal for those extra heavy duty applications.

It comprises of X24 - a steerable 24 tonne skate with turntable and 2 x Y24 - 12 tonne trailing skates - giving a distributed load capacity of 48 tonnes.

X24 has a 24 tonne capacity and consists of 12 rollers containing a total of 24 bearings, along with a thrust bearing, supporting a 220mm diameter turntable. The handle length is 1760mm.

The 2 – Y24 units each consist of 6 large rollers containing a total of 12 bearings in each, with a plate size of 330 x 200mm on each. The supporting bar between each unit allows for adjustment between 600 and 2000mm.

Skates are powder coated with a durable finish.

We also keep a range of hydraulic lifting and toe jacks, to assist with lifting the machinery.

As with all machinery skates, it is recommended the floor is level, clean of debris, the load will not tip over and you have means of controlling the movement of load once moving.

Picture shown for illustration purposes

Model		Capacity (Ton)	No. of Rollers	Dimensions of Turnplate (mm)	Length of Handle / Adjusting Length of Lever (mm)	Overall Size (mm)	Nett Weight (kg)
X24+Y24	X24	24	12	220	1760	882x684x162	240
	Y24		12	330 x 200	600-2000	230x330x162
