

PALLET TRUCK WITH HAND BRAKE—WIDE DESIGN

This 2500kg pallet truck features a progressive brake helping to provide stability and control on inclines.

It has Tandem PU load rollers and PU Steer wheels, which help distribute the load better and are quieter and more forgiving on floors. Pallet entry and exit rollers assist further in their ease of use.

This wider version is designed to make wider pallets such as those of the standard Chep or GKN Blue pallets much more stable and less likely to arc. The pallet truck handle also has a 3 position lever, which allow a slower controllable lowering when required.

Model	AC25HB-685X1150
Capacity (kg)	2500
Width across the forks (mm)	685
Fork length (mm)	1150
Min. fork height (mm)	85
Max. fork height (mm)	200
Steering wheel diameter (mm)	200X50
Load roller diameter (mm)	80X70
Handle height (mm)	1230
Total Length (mm)	1540
Weight (kg)	89
Fork dimensions (mm)	160x50
